

## Weymouth Township Elementary

### Gifted & Talented 2022-2023

The Weymouth Township School Gifted and Talented program appreciates the needs of students who possess and demonstrate significantly high levels of ability. Weymouth Township School provides academic programming for high achieving students. All teachers differentiate instruction in their classes to meet students where they are academically. Gifted education opens windows of opportunity for students to work to their potential through activities that promote collaboration, innovation, and problem solving.

The pandemic has affected instructional time and state testing, therefore creating less data available for G & T student identification. For the 2022-2023 school year, students who scored a *Level 5—Exceeding Expectations* in ELA and Math or a *Level 4—Advanced Proficiency* in Science will be invited to join a Gifted & Talented class that will meet once a week during the school day. Students will have the opportunity to participate in a Project Based Learning (PBL) activity where they will choose a personally meaningful project and actively engage in problem solving, conduct deep research, ask complex questions, exhibit critical thinking, collaborate, and improve time-management skills.

Letters will be sent with the 2nd Marking Period Report Cards.
